How do I set the reporting method?

Mari Opstad - 2026-09-25 - Comments (0) - Setup and customization

How do I set the reporting method?

Reporting method determines how often the watch sends its position. You can choose between a fixed interval or reporting based on steps.

Step by step:

1. Open the Care Tracker app.
2. Select the watch you want to change.
3. Go to Settings › Reporting method.
4. Choose between Standard and Step-based.
5. For Standard, set how often the watch should send its position.
6. For Step-based, set the number of steps and a backup interval.
7. Tap Save to activate the setting.

Tip:

Choose Step-based if you want longer battery life when the person moves around less. Choose Standard if you prefer a fixed and predictable update frequency.
