# Delete Wi-Fi Network

Mari Opstad - 2025-11-28 - [Comments \(0\)](#) - [Wi-Fi netværk](#)

## Delete Wi-Fi Network

This guide explains how to delete a Wi-Fi network in the Stella Care [Administration System](#). This function is used when a network is no longer in use or when an incorrect network needs to be removed from the list.

### How to delete a Wi-Fi network

1. Go to the **Wi-Fi Networks** menu in the left side of the Administration System.
2. Find the network you want to delete in the list.
3. Click the **trash icon** next to the network.
4. A window will open asking you to confirm the deletion.
5. Click **Yes** to confirm, or **No** if you want to abort the action.

The network will now be removed from the system and will no longer be used by the devices.

### Tips

- Only delete networks that are no longer relevant to avoid connection issues for devices.
- If you are unsure whether a network should be deleted, you can contact Stella Care Support via the form on our website or call us at +45 42 42 90 60.
