Device settings

This guide explains which settings you can adjust for a device in the Stella Care app, and how to customize sound and naming as needed.

How to open device settings

1. Go to **Devices** in the app, or open the citizen's page and select the device.
2. Tap the device to open its details.
3. Tap **Settings** to open the device's settings menu.

What you can change in device settings

Device Name

- You can change the device's name to make it easier to recognize in the app.
- Enter the new name and save the change.

Sound Settings

- Choose which sound the device should use for alarms.
- Choose which sound the device should use for warnings such as low battery.
- You can turn vibration and sounds on or off as needed.

These settings make it possible to tailor the device's notifications so they match the citizen's needs and your workflows.

Tips

- Use a name that makes it easy to see which citizen the device belongs to.
- Choose a clear alarm sound so important events are not overlooked.
