Log out of the Administration System

Mari Opstad - 2025-11-07 - [Comments \(0\)](#) - [Navigation and login](#)

Log out of the Administration System

This guide explains how to safely log out of Stella Care's [Administration System](#) when you finish working.

How to log out

1. Find the navigation bar on the left side of your screen.
2. Scroll down to the bottom of the menu.
3. Click on the button called "Log out".

The system will immediately log you out and return you to the login page.

Good practice

- Always log out when leaving your computer, especially if you're using a shared workstation.
- Close your browser completely to prevent others from reopening your session.
- If you experience automatic login issues after logging out, clear your browser cookies and log in again.
